Saving and unzipping a file: Chrome

Audio files are very large files. All files are compressed (shrunk) into a .zip folder so that they are faster to download. In order to use the file on a computer, you must first "unzip" the file to make them usable again. Instructions differ based on the Internet Browser you are using. These are the instructions for Chrome.

Go to the <u>Chrome</u> internet browser. Proceed to <u>https://nnels.ca</u> and select an item to download.

- Click on the link to Download the Daisy File
 - A large arrow will appear at the bottom left of the screen and the download will begin. A green circle will show the progress of the file transfer.

- The file is finished loading when the green circle disappears.
- Once the download is complete, click on the button at the bottom left of the window.
- This will bring up a new window.
- Unzip the folder by clicking on the button that says "Extract all files"

• This will bring up a new window asking where you would like to save the extracted/unzipped files:

Select a Destination and Extract Files	
Files will be extracted to this folder:

• Remember where you saved the file to, as you will need to find it, in order to use the file in another device.
